RUF|Betten inspire with new fabric trends 2018

DELICATE NATURE GREETES SOFT PASTEL

Rastatt, 25/09/2017 (trg). It blends naturally into the world of sleep, has a calming effect on body and soul and lends each bed an elegant note: The new interior favourite colour sage: With its subtle mix of grey-green, it is simply perfect for emphasising gentle colour accents and lending a subtle spiciness to a room. Your favourite partner for this? A soft rosewood or quiet mauve, which together with the new trend tone, conjure up an ideal colour triad. Time and again we see the trio in the harmonious mix of colours with another green trend favourite: Avocado. Here luxurious silver works just as well as the latest marble shades, which look particularly elegant when combined with a cool blue. In combination with the light Scandinavian wood tones, they provide for a gentle, bright appearance, which discreetly adapts to any living environment.

THE NEW HAPTICS – FEEL AND EXPERIENCE MATERIALS

Experience trends with all senses – the new fabric range pays tribute to the feel-good factor, since never before have materials have been so tempting to touch. Especially the velvety textures which reveal a new interesting colour shade with every touch and become a real eye catcher. They are complemented by the soft woven material from cosy Bouclé, the soft three-dimensional structural materials with interesting waffle patterns or also high-quality linen covers that appear both natural and elegant at the same time. Still very much in vogue: The multicoloured material that sophisticatedly unites several worlds of colour with one another and presents itself as the ideal combination partner.

Our summary: This is how the new trends really get you in the mood for interior design, and inspire everyone to reinvent themselves!
